

Health plans can generate millions in savings by leveraging advanced technology to drive improved payment integrity.

Discovery Health Partners' suite of payment integrity software and solutions helps health plans improve recoveries, avoid costs, and optimize revenue.

Our model for improved payment integrity:

Identifying the right opportunities for recovery is the crucial first step toward payment integrity.

- ▶ How do we accurately **identify** the best cases for subrogation or coordination of benefits?
- ▶ What data sources can we use to help us **identify** more opportunities?
- ▶ How can we ensure our **identification** processes are flexible enough to change with our business?

How can we help?

The Discovery Payment Integrity Suite™ of software and solutions resides on our proprietary Healthcare Analytics Platform. By leveraging state-of-the-art data mining and analytics technology, we can identify more opportunities for recovery, with more accuracy and flexibility than any other solution.

- ▶ Powerful data mining, predictive analytics, and factor scoring
- ▶ Flexible, table-driven processes, customized to your specific requirements
- ▶ Seamless integration of data from multiple sources and systems

To learn more about our solutions, contact us today at sales@discoveryhealthpartners.com or 678.296.8918.

Subrogation

Our Subrogation solution makes full use of available data sources, including all diagnosis, procedure and revenue codes. Our identification models are dynamic and flexible, enabling fine-tuning of the identification process to achieve optimum accuracy in case identification.

Coordination of Benefits

Our data-driven approach to Coordination of Benefits (COB) integrates member information from CMS reporting, Medicare Secondary Payer (MSP) files, data-matching services, and other resources. Sophisticated data mining techniques identify other coverage and deliver improved recoveries.
