

SUBROGATION

Maximize savings and recoveries for accident-related claims

Whether due to an accident or serious illness, subrogation plays a vital role in ensuring payment integrity. Claims that are the responsibility of another payer amount to as much as \$25 per member per year. However, many plans lack the tools and resources to identify and pursue recovery opportunities for high-cost, complex claims.

Discovery Health Partners combines extensive subrogation expertise, advanced technologies, and a data-driven approach to deliver results you can trust. Available as an outsourced service or in-house technology model, our Subrogation solution identifies opportunities, validates cases, and reduces member contact to maximize recoveries for your health plan.

With Discovery's Subrogation, you can:

- Improve case identification while reducing false positives and increasing yield
- Create a positive experience with minimal member contact
- Leverage the expertise of technology and information partners
- Enhance cost avoidance efforts with pre-payment subrogation

Ways we help

- 1. Technology:** Web-based applications help streamline the subrogation process while offering the transparency you expect.
- 2. Expertise:** With skilled subrogation and negotiation tactics, legal and recovery teams work to recoup money on your behalf.
- 3. Efficiency:** Supported by technology and experience, our processes and procedures deliver efficiency and results.

Who is it for?

Payment integrity and Subrogation directors and managers, including at-risk commercial, Medicare Advantage, and Managed Medicaid plans.

What does it do?

Combines the best in subrogation technology, experience, and expertise to deliver measurable results to a health plan's bottom line—all with a flexible delivery model.

How does it work?

With advanced analytics, evolving algorithms, case management dashboards, and intelligent technology deployment, we provide the expertise needed to quickly identify and validate cases and accelerate recoveries.

Collaboration with partners

Our data analytics, machine learning, and rules-based analysis allow us to continuously refine our case identification methodology and determine the most effective validation methods. This helps to reduce false positives and increase yield.

Proactive cost avoidance

When combined with traditional subrogation recovery, pre-payment subrogation creates a holistic approach to maximizing savings, eliminating rework, and quickly identifying cases.

Flexible delivery

Subrogation is available as an outsourced service or in-house technology, complementing your teams and technologies in the way that suits your organization best.

Contact us today for more information about how Discovery Health Partners can improve your subrogation recoveries and avoidance.

Results

A prominent regional health plan with 110,000 members partnered with Discovery Health Partners to strengthen its subrogation program. Over a 30-month period, this resulted in:

- \$6.5 million in subrogation recoveries
- \$22 million combined recoveries using Discovery's Coordination of Benefits, Subrogation, and Medicare Secondary Payer Validation solutions
